April 25, 2007

Dear Colleagues, dear friends

We like to introduce to you the 2nd Congress of the German Society for Stem Cell Research to be held in Würzburg, Germany, October 4-6.

Please feel free to view the progress of the program development via our congress web-site (<http://www.kmb-lentzsch.de/gsz2007/index.html>).

This meeting covers basic and translational research in the stem cell field as well as cell-based regenerative medicine. A number of distinguished speakers have already agreed for up-to-date plenary and keynote presentations.

We would be happy if you could further distribute this information on congress, registration as well as the abstract submission into your group. Please note the low registration costs aiming to attract young scientists to this meeting.

We're looking forward to seeing you in Würzburg

On behalf of the organising committee

Meike Weber
